Compiler Design :

Can I do without any additional Subjects requirement?

↳ few Basics of C & TOC

You no need to worry
Because, I will cover in class

Compiler Design

[7-8M]

1) Basics

2) Lexical Analysis

*** 3) Syntax Analysis

4) SDT

5) Intermediate Code

** 6) Code optimization

7) Run Time Environment

Introduction :

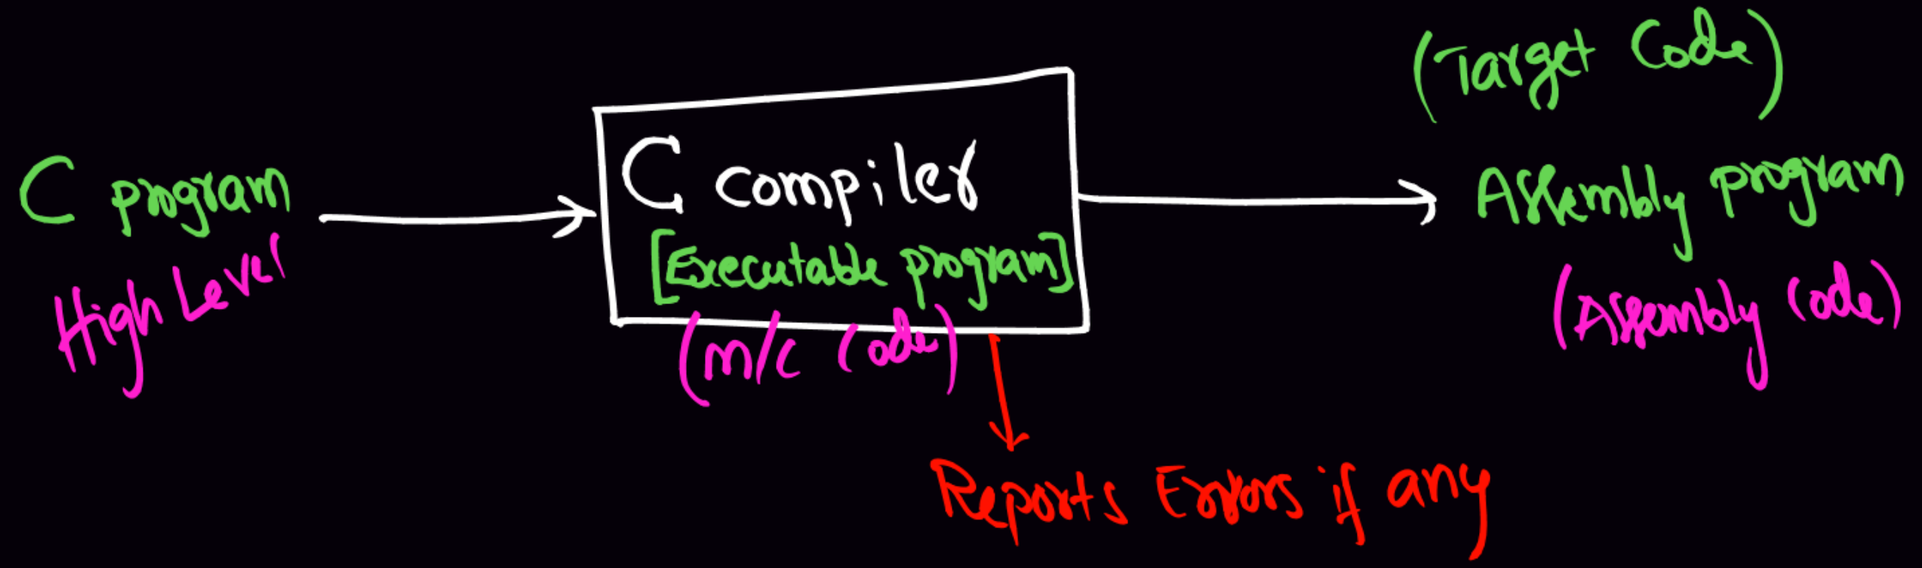
What is Compiler ?

Basics :

- Translators
- * Language process
- * Types of Errors
- C Basics
- TOC Basics

Compiler :

- It is "Translator".
- It is "machine"
- It is s/w [program]



AMD

Qualcomm

Intel

Tech Mahindra

Semiconductor Related

NVIDIA

C/C++

H/W interaction

Basics :

Instruction
Statement

Code

Program : set of statements

Language : Set of programs

Data

Constant : integers, Characters, real, string

Code

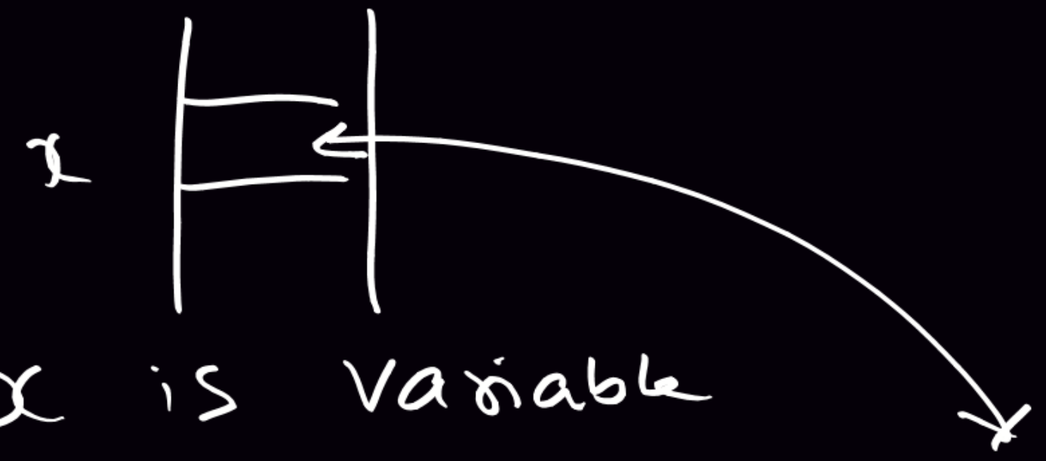
Data

code

```
Void main( )
{
    int x=10;
    int y;
    scanf("%d",&y);
}
```

data

int x ;

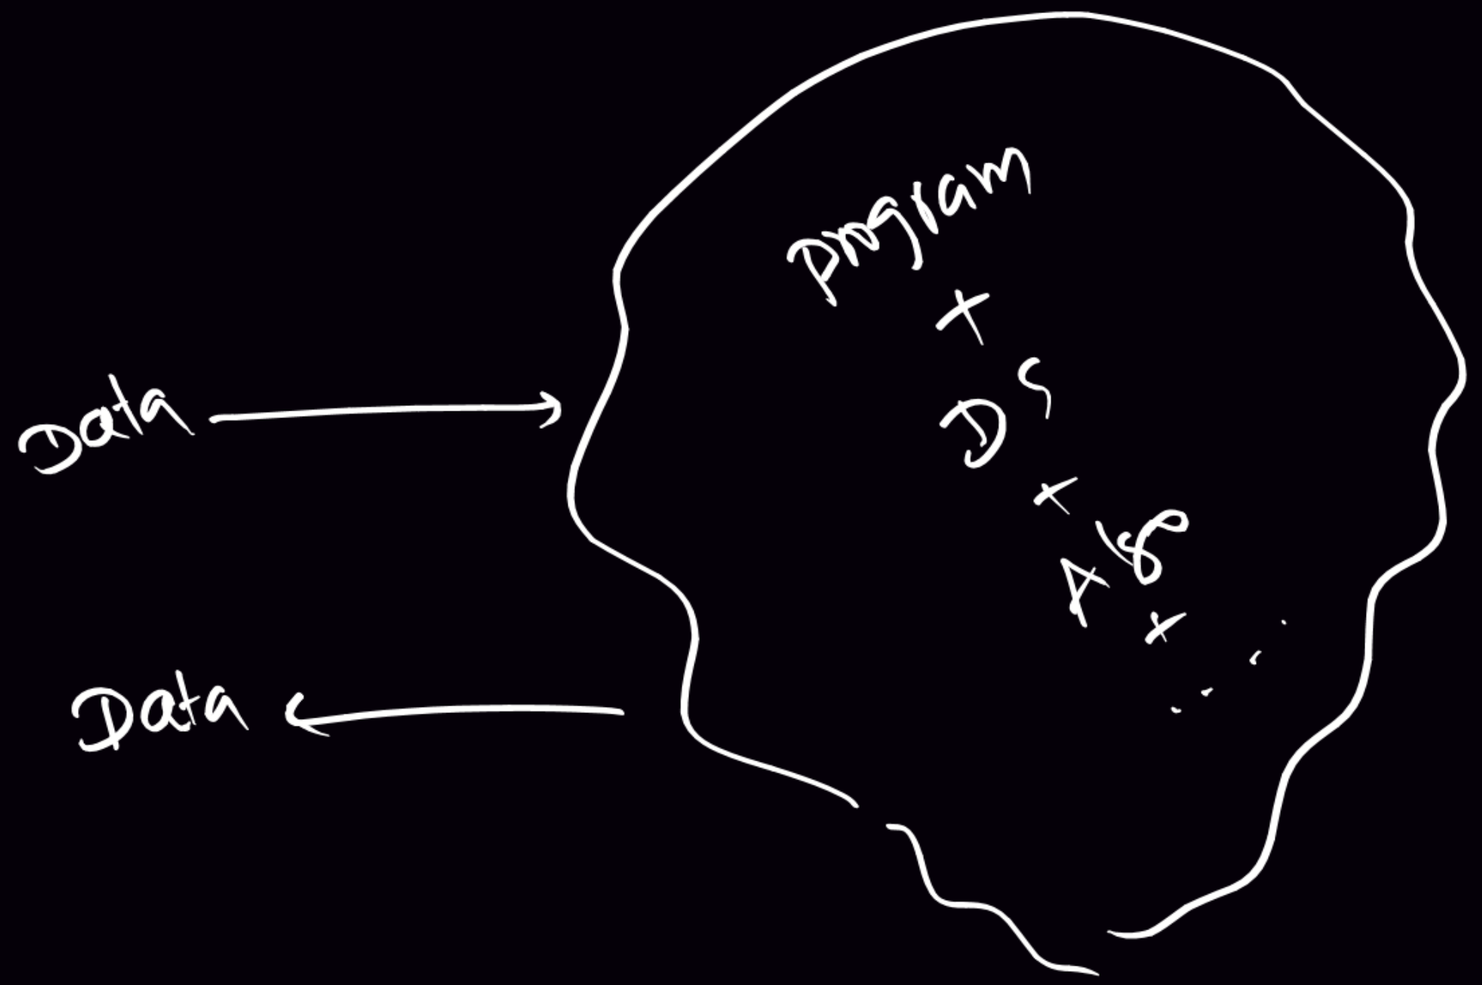


For outside world we need to deal with data.

For programmer : x is variable

For Compiler : x is identifier (Symbol) unknown

For System : x is Address



Data
Data
program
+
DS
+
ASP
+
...

Translators:

Compiler

Interpreter

preprocessor

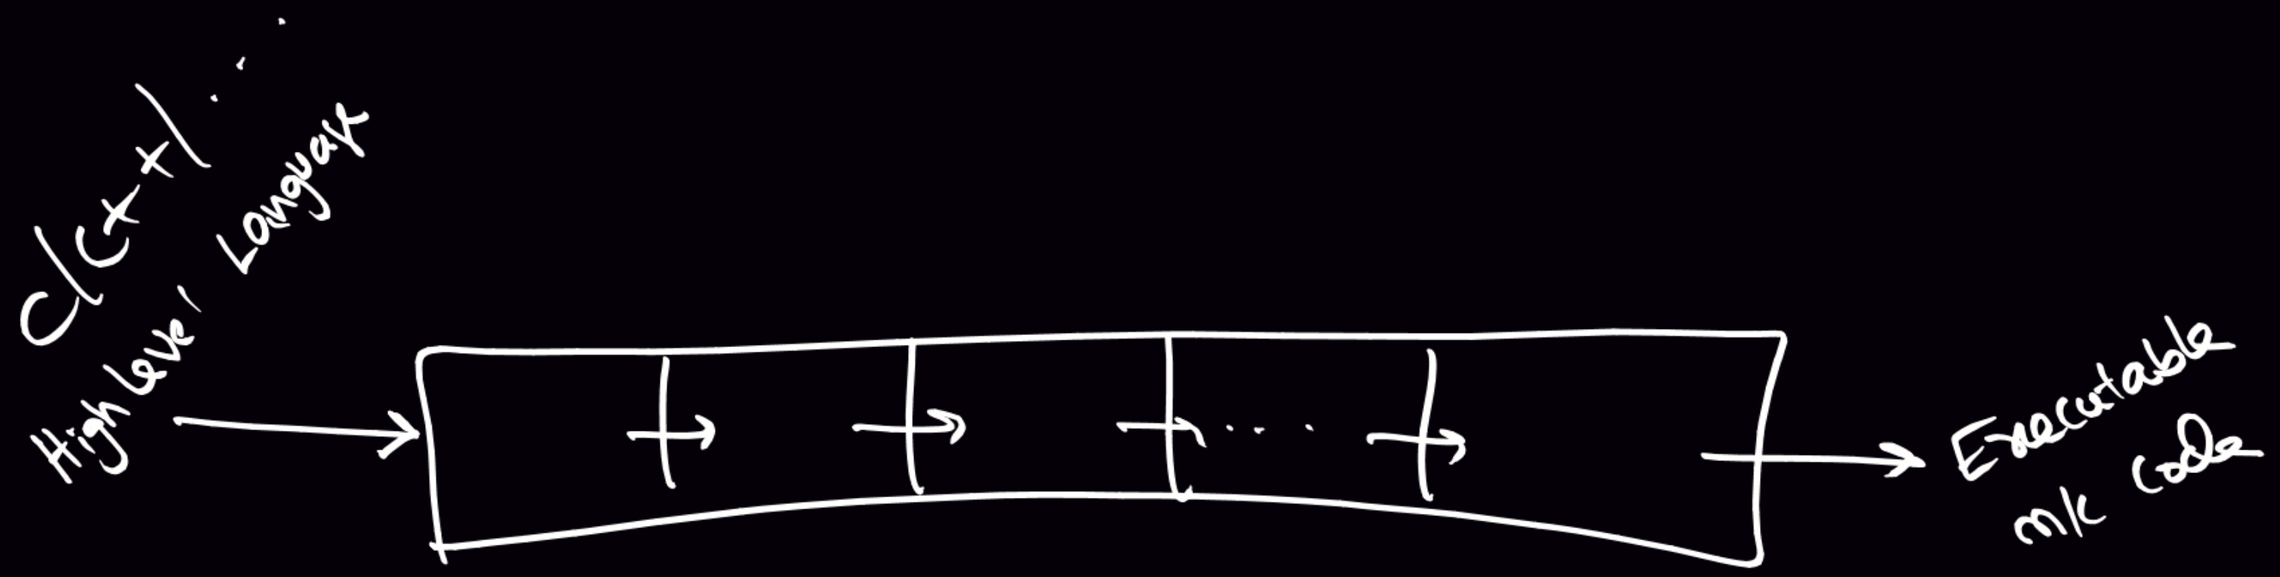
Assembler

Loader

Linker

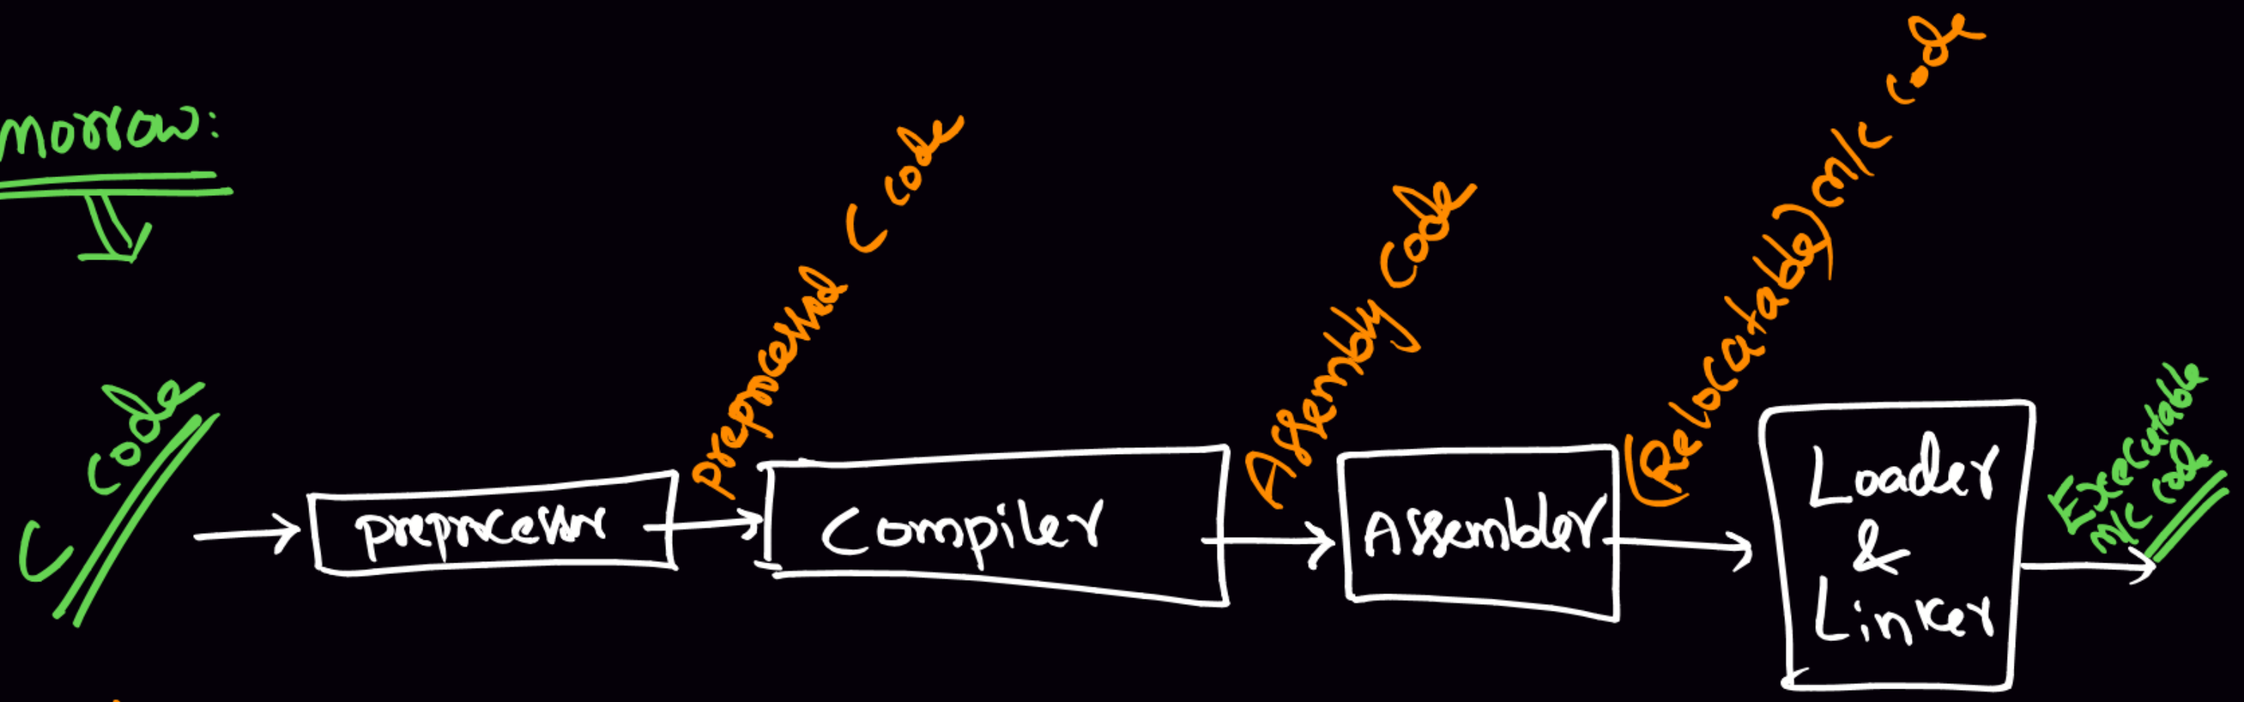
Editor

⋮



Language processing system

Tomorrow:



2000 : MOV [1000], 10

Address — Code (MOV [1000], 10); address: [1000]; data: 10

C Language processing system
